LAB RESULTS REVIEW BY NURSE PRACTITIONER/MEDICAL DOCTOR

- SECURE AND CONFIDENTIAL LAB RESULTS WITH FOLLOW UP RECOMMENDATIONS AND EDUCATIONAL MATERIALS

INFLUENZA COVID-19 VACCINATIONS

OUR MISSION: Empower our participants to take charge of their health by facilitating and delivering comprehensive corporate wellness programs

OUR PURPOSE: Shift the focus of healthcare from *reactive medicine* to *proactive preventive care*

We provide convenient on-site corporate wellness programs. This is our core competency. Through new health care legislation, we offer our clients insurance paid preventative health screenings & vaccinations with no co-pay, no deductible and no co-insurance. For self-funded companies, we offer a cost-effective company invoiced option.

WHO WE ARE

We are a comprehensive on-site wellness company dedicated to providing preventative health services. We are based in Boise, Idaho and offer our services across the region. We focus on a single core competency – health screenings to provide our clinic participants with personalized wellness information and guidance.

WHAT MAKES US DIFFERENT?

We recognize that every company is unique, so our programs are tailored to meet your organizations needs and enable participants to achieve their health goals. Our client services team focuses on providing the support, expertise and guidance to meet your organizational needs. Our clinical team focuses on enabling participants to achieve their health goals through our wellness services. We understand the need to provide dedicated teams responsible for supporting the relationship with our clients and supporting the relationship with each individual participant.

Preventative Health is a contracted participating provider with all major insurance carriers. Please see our website, PreventativeHealthScreenings.com for a comprehensive list or contact our staff directly.

DID YOU KNOW?

- » For every **\$1** spent on a comprehensive wellness program, **ROI = \$3-\$5**
- » Preventable illness makes up **75%** of illnesses and associated costs... yet **<3%** of healthcare costs are spent on prevention
- » **95%** of our nation's health expenditures are committed to diagnosing and treating disease only after it becomes manifest
